WELCOME MESSAGE

Dear Colleagues,

The nutrition and metabolism in children and adolescents affect a vulnerable population and special condition, which can no longer be ignored. The roadmap for childhood adequate nutrition from maternal, preterm, breastfeeding, complementary foods provided a strategic framework to address the epidemic nutrition and metabolism in children's growth and development -such as stunting and obesity, despite the existing common metabolic disorder in infancy that need a significant roadmap to practice essential.

It is critical to reflect on the lessons learned in the implementation of interventions at local, national, regional and global levels, to allow replication and scale-up of our best practices, and to identify any remaining challenges. The theme this year "Best Practice in Common Nutrition Problems" will serve to discuss appropriate diagnosis and treatment of advance integration within the childhood care and prevention in the broader context of universal health coverage, including maternal and child health/reproductive, newborn, child and adolescent health, given by an outstanding presenters from both national and international expertise.

The 4th Indonesian Pediatric Nutrition & Metabolic Disease (4th NUTRIMET) Update from 05, 06-07 March 2021 held by the Nutrition and Metabolic Disease Working Group/Indonesian Pediatric Society, is offering great opportunity for Pediatricians, Physicians, Dieticians, Pharmacists, Nutritionists, Scientists, Nurses and other Healthcare Professionals –involved in nutrition and metabolism field to meet and discuss cutting edge science and practical guidelines, reinforcing old and stimulating new collaborations.
